In view of the amendment filed on April 6, 2004, some claims are continued to be unpatentable as following:

Drawings

1. The drawings are objected to because Fig. 1(a) does not reflect Fig. 1(b). There should be some portion of 1st land shown through the opening of 8. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1775

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 4-6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Darveaux et al (US 6201305).

Darveaux discloses a circuit structure comprised of a central pad (14), via hole (18), an insulating substrate (12), and a solder mask (20).

The central pad (14) has a plurality of extensions formed radiating outward (Figs. 3A & 4A).

The central pad (14) has an opening which lines up with the via hole (18), wherein the via hole is formed in the insulating substrate (12). The via hole is plated with a conductive material, and is used for connecting conductive pads and/or traces from the opposite surfaces of the insulating substrate (12) (col 1 L 54-60).

The solder mask (20) has an opening which exposes the entire central pad (14) and portions of the circuit traces (16) (or extensions) and surface of the insulating substrate (12) (col 2 L 17-21 & Figs. 3A & 4A).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Darveaux et al (US 6201305).

Darveaux meets the present invention, but does not teach the particular shapes and opening arrangement of claims 7 and 8.

In view of the prior art teaching, one skilled in the art would choose a desired shape of opening, because choosing a shape of opening is just a matter of design choice.

Allowable Subject Matter

6. Claims 9-15 are allowed.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
